### 5. Child-proof lid

Use the small screw provided to secure the lid in position.

## 3P Evergreen Lite 300L

## Instruction Sheet

The Evergreen Lite Water Butt is delivered with a full kit which includes a wall bracket, brass tap and screws.

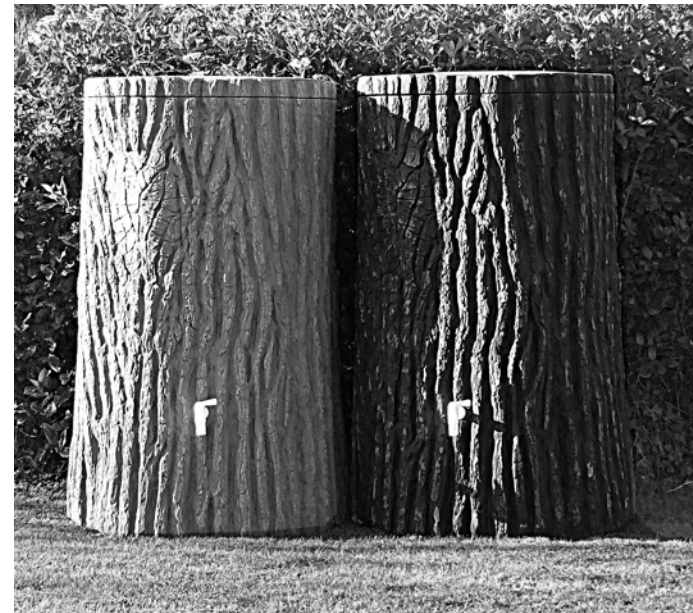

To fill the Evergreen Lite, we recommend using the 3P Filter Collector Universal. Where the water butt cannot be located within 30 cm of the down pipe, longer Universal Long Link Kits are available online (Art. No. 9000123U, U2, to U5).

If in any doubt during installation, please consult a professional tradesman.

### 1. Setting up

Site the Evergreen Lite on a firm level surface, adjacent to the downpipe.

Refer to your Filter Collector Universal instructions or other rain diverter instructions.

### 2. Fitting a 3P Filter Collector (optional)

#### Other Diverters & Connectors

Refer to your diverter's instructions for the correct sized hole to drill. To fill the water butt with the 3P Filter Collector, use the flat bit from the set provided. You *may* even be able to use the hole saws supplied by 3P. Check before proceeding.

#### Marking Out

Measure down 90 mm from the top of the water butt. This position is ideal for connections at 32 mm or smaller.

#### Drilling

Offer the drill to the marked point, proceed to drill the hole at your selected holes size for your connection set.  
Check and re-check you are going to drill the correct size of hole for the connection set that you are using.

### 3. Connecting the Tap

Screw the 3/4" brass tap provided in the kit into the 3/4" BSP connection thread. If necessary, use PTFE tape when installing the tap for extra protection and to make sure it sits in the correct position.

### 4. Winter Care Precautions

To prevent any damage from being caused, the Evergreen Lite must be drained completely and disconnected from the rainwater inlet during prolonged freezing weather conditions.
